**Barry R.; Greaney, Thomas L.; Johnson, Sandra H.; Jost, Timothy Stoltzfu Furrow : Health Law - Cases, Materials And Problems (American Casebook Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Health Law - Cases, Materials And Problems (American Casebook Series):

This second edition maintains and enhances the features that made the first edition of this book so popular among health law teachers and students. Our goal continues to be to produce a teachable book. We retain, often in updated form, many of the problems from the first edition and have added new problems, allowing students to struggle with applying the law in situations similar to those they might encounter in practice. We continue to supply an ample store of legal material-cases, statutes, and regulations-supplemented, but not supplanted, by readings in health policy. We have attempted to retain as many materials as possible from the first edition to ease preparation for teaching the second edition, replacing or supplementing only where new developments necessitate updating. We also continue to present all sides of policy issues, not to evangelize for any political, economic, or social agenda of our own.
