Chas. M. Higgins : Horrors of Vaccination Exposed and Illustrated before purchasing it in order to gage whether or not it would be worth my time, and all praised Horrors of Vaccination Exposed and Illustrated:

It is simply amazing to me that the issues that people were facing at the introduction of vaccinations. These issues still exist today and have been attempted to be swept under the rug. Allopathic medicine is poisonous to your health and this book exemplifies any doubts you may have. "Health" has nothing to do with today's health care. I feel the most powerful message you can absorb is, RESEARCH!

Irrelevant for today's vaccine issues. By Live Mindfully Charles Higgins MD published his petition against the "horrors of vaccines" in 1920. This reprint regained popularity only because of today's misguided debate. The cover inadequately explains, and reviewers here don't seem to acknowledge, that the opinion of this physician from a century ago does not account for the subsequent century of research and accumulated knowledge. The fact that opponents of vaccines cite the book for evidence to support their position speaks for itself. 26 of 26 people found the following review helpful. Vaccinations are dangerous and a crime forced on our society. By J. Rizk This book is a fascinating look at our constitutional rights and the current medical trends that are taking those rights away. We have a right in this country to decide what is best for our bodies whether nutritional or medical. However, the FDA, AMA and other groups continue on an every growing basis to take these rights away. Whether through forced vaccination programs, limiting food labeling (so we don't know if something is genetically modified or radiated, etc.) or making it harder to seek alternative medical treatment, our government is closer every day to controlling our very bodies. Conspiracy theory? Not this time.

2009 reprint of the 1920 edition. This profusely illustrated early treatise on the horrors of compulsory vaccination was first published in 1920. Higgins believed it to be a legal atrocity and a gross violation of basic American rights. He sets out to detail the "many shocking facts, proofs and exhibits which I have been collecting for years, and which, as now massed in the Petition and its Illustrated Supplement, can, I think, leave no doubt in the mind of any reasonable man or woman...that compulsory vaccination should be immediately abolished, and that its continuation, with these proofs against it, would be a most gross medical blunder and malpractice and a grave violation of the basic American principle of Inherent Individual Rights..."
