The software is probably the last piece of pure MS-DOS software still being actively marketed.The user interface is so bad that it is difficult to see through to the underlying support calculation software. However, the software does provide you with an inexpensive alternative to sitting with your CPA or Attorney and paying \$200/hr to try various support scenarios on DissoMaster.But be prepared for an extremely frustrating software experience.6 of 7 people found the following review helpful. Unable to install software on Windows 98By A CustomerDos based software/old formats etc. Unable to use. Without software the book is virtually useless. I would prefer to have my money back.7 of 7 people found the following review helpful. Latest version New

and Very Improved By A Customer Last year I purchased the DOS version of this program--everyone's right, it was atrocious. However, I just bought the new Windows compatible version and it is outstanding. Very simple to use and I've had direct experience in comparing it with the Dissomaster program that's widely used by courts--and the results are consistently the same. Given that lawyers can charge \$100 or more for a Dissomaster run, this program and book are a bargain.
