From Brand: Routledge-Cavendish : Human Fertilisation and Embryology: Reproducing Regulation (Biomedical Law and Ethics Library) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Human Fertilisation and Embryology: Reproducing Regulation (Biomedical Law and Ethics

Library):

Relevant to students, academics and practitioners across the globe, this original volume highlights contemporary issues associated with assisted reproduction and embryology and critically analyzes the law surrounding human reproduction in the light of case law and technological developments since the Human Fertilisation and Embryology Act (HFE Act) was passed in 1990. Tackling issues from an interdisciplinary perspective, the authors identify and evaluate areas that have provoked intense public and academic debate as well as those where further or renewed regulation is needed. Focusing primarily on the legal and ethical issues involved in regulating this area in the UK, which is at the forefront of developing legislation in this area, this book has international relevance as many countries have used the UK as a model for their own legislation. This text is suitable for a broad range of readers, including legal academics, law students and practitioners interested in the areas of medical/healthcare law and ethics, bioethics and moral philosophy, family law, sociology and reproductive medicine and genetics.

"[Human Fertilisation and Embryology does] a wonderful job of encouraging readers to think critically about regulatory issues around human reproductive science, and to remember the very subjective nature of the perfect child" - Julie McCandless, *Feminist Legal Studies*, vol. 15 no. 3(2007)

About the Author
Dr Kirsty Horsey is a lecturer in law at the University of Kent. She is reproduction editor of BioNews, a web and email based service of news, information and comment on assisted reproduction and human genetics. Hazel Biggs is Professor of Medical Law at Lancaster University. Previously she was Director of Medical Law at the University of Kent. Her work encompasses most areas of medical law with a particular emphasis on autonomy, choice and informed decision-making. She is an editor for *Medical Law* and is affiliated to the Centre for the Economic and Social Aspects of Genomics (CESAGen) at Lancaster University.
