**From Brill - Nijhoff : Implementing the Nagoya Protocol: Comparing Access and Benefit-Sharing Regimes in Europe (Legal Studies on Access and Benefit-Sharing)** before purchasing it in order to gage whether or not it

would be worth my time, and all praised *Implementing the Nagoya Protocol: Comparing Access and Benefit-Sharing Regimes in Europe (Legal Studies on Access and Benefit-Sharing)*:

The adoption of the Nagoya Protocol on Access and Benefit-sharing to the Convention on Biological Diversity in 2010 is a major landmark for the global governance of genetic resources and traditional knowledge. The way in which it will be translated into practice will however depend on the concrete implementation in national country legislation across the world. *Implementing the Nagoya Protocol* compares existing ABS regimes in ten European countries, including one non-EU member and one EU candidate country, and critically explores several cross-cutting issues related to the implementation of the Nagoya Protocol in the EU. Gathering some of the most professional and widely acclaimed experts in ABS issues, this book takes a major step towards filling a gap in the vast body of literature on national and regional implementation of global commitments regarding ABS and traditional knowledge.
