From University of Cape Town Press : Innovation Intellectual Property: Collaborative Dynamics in Africa before purchasing it in order to gage whether or not it would be worth my time, and all praised Innovation Intellectual Property: Collaborative Dynamics in Africa:

The Open African Innovation Research and Training (Open A.I.R.) project focused on the intersection of innovation,

intellectual property (IP), and development in Africa and this book offers its research findings. Its case studies cover nine African countries: Egypt, Nigeria, Ghana, Ethiopia, Uganda, Kenya, Mozambique, Botswana, and South Africa. Looking at IP rights in a range of sites of innovation: agricultural production, biofuel technology, traditional medicine, research collaboration, automotive manufacturing, music production, and scholarly publishing.

Africa is increasingly being acknowledged as an emerging region economically and this makes intellectual property an especially timely issue. Africans need to know about IP and of course many parts of the continent have a growing middle class reading public. People outside Africa also need now to know about IP there. Professor Graham Dutfield, Leeds University, UK
