Britten Sessions : Intellectual Property Clinic Manual before purchasing it in order to gage whether or not it would be worth my time, and all praised Intellectual Property Clinic Manual:

This book combines theoretical teachings with practical realities. In essence, it teaches how to work effectively in all aspects of intellectual property, including dealing with clients, drafting applications, responding to office actions, among other items. The focus of this manual is to teach a little bit very thoroughly. This is intentional. The Clinic does not provide services for every aspect of patents or trademarks - it only provides the fundamentals. But the hope is that by mastering such fundamentals, you can be in a position to learn and master any additional concept and/or skill in IP

law thereafter. Much like construction, this manual will assist you in creating a solid skill base. The goal is that 50 years from now, you will look back and see that such skills assisted you in building a successful career in IP law.

About the Author
Britten Sessions is a patent attorney at Zilka-Kotab, PC. He has years of experience in working in every stage of the patent process, including early-stage IP opportunities, strategic preparation and procurement of patents, and alignment of patent portfolios with business strategies. Currently, Professor Sessions manages the IP Department at Lincoln Law School of San Jose, and is the Founder/Director of its Intellectual Property Clinic. He has authored many publications, including a 600 page textbook, and several peer-reviewed articles.
