Graham Dutfield : Intellectual Property Rights, Trade and Biodiversity: Seeds And Plant Varieties before purchasing it in order to gage whether or not it would be worth my time, and all praised Intellectual Property Rights, Trade and Biodiversity: Seeds And Plant Varieties:

The intellectual property rights (IPRs) associated with plant genetic resources are often critical to trade, yet no unified international framework for a fair IPR regime exists. This book examines the international agreements relevant to IPRs: the Convention on Biological Diversity (CBD); the World Trade Organization's TRIPS Agreement; and the Convention of the International Union for the Protection of New Varieties of Plants (UPOV). It sets out to establish an equitable IPR regime for biodiversity, taking into account ethical concerns over patenting life forms, environmental and social impacts, technology transfer and the relation between traditional knowledge and IPRs.

"...an excellent review of the issues and an invaluable resource for all those who want answers to this elusive topic." --
Calestous Juma, former Executive Secretary of the Convention on Biological Diversity
About the Author
Graham Dutfield is Senior Research Fellow at Queen Mary College London. He is co-editor of *Trading in Knowledge* (2003,) and *Intellectual Property Rights, Trade and Biodiversity* (2002).
