From Routledge : International Arbitration Discourse and Practices in Asia (Law, Language and Communication) before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Arbitration Discourse and Practices in Asia (Law, Language and Communication):

International business exchanges between and with Asian countries have increased enormously over the last few years. As a natural consequence, this has brought about an increasing number of trade disputes that are being resolved

through arbitration as an effective alternative to more expensive litigation. This volume offers a variety of perspectives on this important international dispute resolution practice in Asia. Essentially interdisciplinary in approach, it brings together specialists in law, international commercial arbitration and discourse analysis. The contributing authors include practitioners as well as academics. Together they explore the interrelations between discourses and practices in the field of arbitration in Asia. The work also investigates the extent to which the integrity of arbitration principles, typical of international commercial arbitration practice, is maintained in various Asian contexts. The authors focus particularly on arbitration norms and practices as they are influenced by local juridical, cultural and linguistic factors. The book will be a valuable resource for academics and practitioners working in the areas of arbitration and dispute resolution, as well as researchers with an interest in language, communication and discourse analysis.
