This special break-out edition is adapted from the authors' widely used International Business Transactions: A

Problem-Oriented Coursebook , 11th. The purpose of this volume is to facilitate a focused study of the contractual issues arising out of international sales transactions. After a brief introduction to the conduct of business in the world community, the book uses hypothetical problems to present some of the most typical and important contract law issues arising out of international sales transactions and letters of credit in conjunction with related readings and materials. The primary focus is on lawyers, public and private, as problem solvers.
