From American Bar Association : International Environmental Law: The Practitioners Guide to the Laws of the Planet before purchasing it in order to gage whether or not it would be worth my time, and all praised International Environmental Law: The Practitioners Guide to the Laws of the Planet:

Until recently, international environmental law was largely the focus of diplomatic discussions, treaty negotiations, and academic debates of interest to a group of passionate and patient attorneys working for governments and

international nongovernmental organizations. With clients becoming multinational in nature and faced with a rapidly emerging and confusing regime of international environmental laws, understanding international environmental law is becoming a core skillset for every environmental attorney. International Environmental Law helps attorneys understand the unique ramifications of these laws, regardless of where they practice and whom they represent. Written by attorneys with extensive experience in the area, International Environmental Law provides an analytical framework to help practitioners advise clients, whether from law firms, in house, or within government and nongovernmental organizations. The book's authors provide a logical template for considering the most pertinent issues in international environmental law, including air and climate change, water, chemicals and hazardous materials, site remediation, emergency response, natural resource management, environmental review, and civil and criminal enforcement. The book examines the legal regimes in twenty-six key markets, as well as offering an informed discussion on global and cross-border issues.

About the Author Roger R. Martella, Jr. is an international environmental attorney with Sidley Austin LLP in Washington, D.C., focusing on assisting multinational corporations with environmental compliance, sustainable development, and litigation across the globe. J. Brett Grosko is a Trial Attorney in the U.S. Department of Justice Environment and Natural Resources Division in Washington, D.C.
