**Colleen Flood : International Health Care Reform: A Legal, Economic and Political Analysis (Routledge Studies in the Modern World Economy)** before purchasing it in order to gage whether or not it would be worth my time, and all praised International Health Care Reform: A Legal, Economic and Political Analysis (Routledge Studies

in the Modern World Economy):

This book analyses the wave of competition-oriented reform by comparing "internal market reform" (proposed in publicly-funded health care systems) with "managed competition reform" (proposed in systems with a mixture of public/private financing) and the role of "managed care" in each of these reform theories. *International Health Care Reform* clearly explains the arguments in economics and justice for intervention by governments in health care markets; the structure and dynamics of health care systems; and the features of competition-oriented reform models. The book will appeal to students and researchers involved in health policy studies, public health and health economics. It will also be a valuable read for policy-makers internationally.

About the Author Colleen M. Flood is Professor at the Faculty of Law, University of Toronto, Canada.
