Paul Goldstein, Marketa Trimble Landova : International Intellectual Property Law, Cases and Materials, 3d (University Casebooks) (University Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised International Intellectual Property Law, Cases and Materials, 3d (University Casebooks) (University Casebook Series):

2 of 3 people found the following review helpful. Not the right casebook for this area of law By Jenny This book is dated. Most of the articles are pre-2005, which is too old for an evolving field such as international law. It is also not organized in the most intuitive way for students. It starts out with territoriality and then choice of law/forum, which are

actually pretty difficult topics.

This casebook organizes contemporary foreign, as well as U.S., case law and literature to equip law students with the knowledge they need to engage in international intellectual property practice, in both transactional and litigation settings. Carefully selected materials also expose students to the social, economic, and cultural considerations that underpin intellectual property law around the world. Each field of law - copyright, patent, trademark, unfair competition, trade secrets, industrial design - is introduced by a comprehensive author's note placing the field in its international and comparative law context, and extensive notes on the cases and materials fill in relevant details, including currently and historically important topics.
