Paul Goldstein, Marketa Trimble Landova : International Intellectual Property Law, Cases and Materials (University Casebook Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Intellectual Property Law, Cases and Materials (University Casebook Series):

This casebook organizes contemporary foreign, as well as U.S., case law and literature to equip law students with the

knowledge they need to engage in international intellectual property practice, in both transactional and litigation settings. Carefully selected materials also expose students to the social, economic, and cultural considerations that underpin intellectual property law around the world. The casebook covers aspects of public international law, conflict of laws (private international law), and comparative law of intellectual property. Each field of law - copyright, patent, trademark, unfair competition, trade secrets, industrial design - is introduced by a comprehensive authors note placing the field in its international and comparative law context, and extensive notes on the cases and materials fill in relevant details, including currently and historically important topics. Materials on the major fields of intellectual property law are accompanied by materials on other related intellectual property matters, such as the protection of databases, plant varieties, geographical indications of origin, and Internet domain names.
