John Spanogle, Peter Winship : International Sales Law, A Problem-Oriented Coursebook (American Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised International Sales Law, A Problem-Oriented Coursebook (American Casebook Series):

The text, problems and cases address issues of concern not only to litigators but also to transactional lawyers who structure transactions to allocate duties and risks in order to avoid litigation. The materials provide explanations for students unfamiliar with either international sales transactions or domestic sales law. Teachers using the book

themselves need not be specialists. The authors have maintained most of the Problem exercises from the first edition, but have added the leading cases of the past decade to enrich the fabric of the current law. The Teachers Manual suggests ways the materials may be taught and supplemented.
