From Hart Publishing : International Surrogacy Arrangements: Legal Regulation at the International Level (Studies in Private International Law) before purchasing it in order to gage whether or not it would be worth my time, and all praised International Surrogacy Arrangements: Legal Regulation at the International Level (Studies in

Private International Law):

Divided into three parts, this book addresses the pressing challenges presented by the proliferation of international surrogacy arrangements. Part 1 contains National Reports on domestic approaches to surrogacy in the following countries: Argentina, Australia, Belgium, Brazil, China, the Czech Republic, France, Germany, Greece, Guatemala, Hungary, India, Ireland, Israel, Mexico, the Netherlands, New Zealand, Russia, South Africa, Spain, Ukraine, the United Kingdom, the United States, and Venezuela. The reports are written by domestic specialists, each demonstrating the difficult and urgent problems arising in many States as a result of international surrogacy arrangements. These National Reports not only provide the backdrop to the proposed model regulation appearing in Part 3, but serve as a key resource for scrutinizing the most worrying incompatibilities in national laws on surrogacy. Part 2 of the book provides international perspectives on cross-border surrogacy, such as the 'human rights' perspective. Part 3 contains a General Report, which consists of an analysis of the National Reports, together with a proposed model of regulation of international surrogacy arrangements at the international level. (Series: Studies in Private International Law - Vol. 12)

This book is highly insightful and important in its current form. The use of authorities and references is extensive, wide-ranging and noteworthy. It is an important body of knowledge for professionals, in the practice or study of surrogacy and assisted reproductive technologies. Reflections on lessons from a comparative perspective will aid and assist any decisions being taken on regulating surrogacy on an international level. (Vishwam Jindal India Law Journal, Issue 1) An important original contribution of this book is to provide a framework for what a new convention on international surrogacy arrangements could look like. (Graeme Edgerton Law Society Journal, Volume 51. Number 10.) This highly informative book contains, first of all, a remarkable wealth of comparative legal materials on surrogacy, in the forms of national reports, covering a large number of jurisdictions from both sides of the international surrogacy market. (Horatia Muir-Watt Edinburgh Law Journal, Volume 18. 2014) About the Author Paul Beaumont is a Professor of European Union and Private International Law at the University of Aberdeen, Scotland. Katarina Trimmings is a Lecturer at the University of Aberdeen, Scotland.
