**Jonathan Zittrain : Internet Law Jurisdiction (University Casebook Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Internet Law Jurisdiction (University Casebook Series):

This casebook explores Internet Law as a coherent if organic whole integrating the historical sweep of the global Internets development with both the opportunities and problems it has brought about. The book is broad and thorough

enough to be the primary or sole text for a variety of Internet-related courses, while deep enough to bring students through the important nuances of such doctrinal topics as copyright, privacy and jurisdiction without assuming any particular prior exposure to these subfields
