The first book any publisher has come out with specifically dedicated to the work of a full array of transactional clinics, this book serves as the basic introductory reading material for the seminar component of a law school transactional clinical course. The book includes chapters addressing: Skill issues as they relate specifically to transactional practice, including interviewing, counseling, negotiation and drafting; Ethical and professional role issues arising in that type of work; Community group representation and economic development; and Substantive law topics that students typically encounter in transactional clinics. The book also has relevance to simulation-based courses focusing on transactional practice.
