This book is about women taking care of themselves and consciously, smartly dealing with legal situations (business, relationship). As long as we're involved in life - we might as well know what we're getting into up front rather than at the end...when women often discover that we have blindly trusted the wrong things... (I had that experience and really wish I'd known then what I know now...) It's not the ideal, but it's reality - and it's better to learn up front than to spend months or years cleaning up the mess of 'Just signing here'. This a great book for any woman who wants to be taken care of in her life. This will help ensure that you are. (Please, please don't sign anything without reading AND consulting an attorney AND understanding what you're reading.)0 of 1 people found the following review helpful. Not only for women!By A CustomerI just finished this book and was simply amazed at how much I learned from such an interesting and easy to read book. Ms. Barrett was able to take complex issues and make them actually "fun" to read by the way she brought in real life stories as examples. This is a book that men and women should read because it raises one's awareness as to steps that each of us need to take to protect ourselves. I just bought a batch of the books so that i could give my family and friends a copy as I think everyone should read it! It is a gift that you can, and should, give to those you care about.0 of 0 people found the following review helpful. Just what women need!By Dene BallantineJust what women need!
