1 of 2 people found the following review helpful. Good information. Will be helpful for my father-in-lawBy Gilbert B. FlemingI got very concerned when a door to door vacuum cleaner salesman pushed his way into my father-in-laws home and, after my father-in-law made a "911" to my wife and she drove over to his home and kicked out the vacuum cleaner salesman....we found out that my father-in-law was billed on his credit card for PURCHASING a vacuum cleaner. I thought the book provided good information on many subjects: Both protecting an elder from abuse from crooked salesman and also protecting an elder from abuse from their own family.2 of 4 people found the following review helpful. Sorely in need of an editor.By PMI plan to buy this book because the subject matter is very relevant to my current situation, but just in reading the previewed pages of the book, I noticed so many typos, incorrect word usage, etc. that I can't help but think the authors should have had it properly edited prior to publishing. I am one of those people that is distracted by errors when I read, so when typos and wrongly-used wording jumps out at me I find it very annoying. There's just no excuse for having errors in published works with all the auto-correct features we have in word processors today.0 of 1 people found the following review helpful.
