Robert A. Fippinger : Landis on Mechanics of Patent Claim Drafting before purchasing it in order to gage whether or not it would be worth my time, and all praised Landis on Mechanics of Patent Claim Drafting:

14 of 15 people found the following review helpful. How-to referenceBy Geoffrey A. Landis Filing a patent application comprises essentially three parts; writing the disclosure and drawings, drafting the claims, and filing the required work and fees with the Patent Office (which includes dealing with the office actions, if any). This book focuses exclusively on the second of these three parts, writing the claims. The claims are the legal heart of the patent, since they will define exactly what is, and what is not, covered by the patent; the application will be rejected if the claims are too broad, or not supported, or fail to be specific in pointing out the invention; on the other hand, the patent will be useless if the claims are insufficiently inclusive, and a product can bypass the detailed claimed invention. This book covers the details of exactly how to write a good patent claim, that will satisfy the requirements of the U.S.

Patent office, describe the invention clearly and distinctly point out the novel features, and cover the invention sufficiently to stand up in court. It is the classic how-to reference for the practicing patent agent or lawyer.³ of 4 people found the following review helpful. Excellent source to learn claim drafting--"Claim Bible for Patent"By Bishal NepalBy far, this is the best book to refer to for writing patent claims. It covers in detail how to write 101 Statutory claims for product, process, manufacture, and composition of matter, and improvement thereof. Also, this book covers product-by-process claims, means plus function claims, Jepson claims and Markush groups. All three types of patent claims for utility, design and plant are covered.However, at the end of the day, it is the supervisory patent attorney who tells you how he wants you to write the claims.0 of 0 people found the following review helpful. bible likeBy Dingclear concise and exact for beginners 'patent practicers' must have.patent examiner can see what the patent agents and inventors think about the invention.guide the examiner close to and understand them.

Landis on Mechanics of Patent Claim Drafting gives you the very latest word on patent claim drafting, including a new sample exercise for drafting business method claims. You'll learn new ways to deal with claims that involve numerical ranges -- how to understand the different treatments of preamble language, including the CAFC's Catalina Marketing guidelines -- how the CAFC treated the unusual Markush grouping in the Abbott Laboratories case -- how the CAFC interprets substantially, essentially, similar and other words of approximation.

"Truly useful to practitioners at all levels of experience...a must-have." --IP Law WeeklyThis work must be included in the library of anyone who considers himself or herself an attorney [in the field]. --The Licensing JournalThis work must be included in the library of anyone who considers himself or herself an attorney [in the field]. --The Licensing JournalAbout the AuthorRobert C. Faber has been an intellectual property lawyer for over thirty years. He is a graduate of Cornell University and Harvard Law School. He is a partner in the New York City intellectual property law firm of Ostrolenk, Faber, Gerb Soffen.
