Last Wishes: A Family Guidebook is a manual and workbook personally tailored for each family's needs, and offers both organizational aid and step-by-step instructions on settling the affairs of a departed loved one. In the workbook section of Last Wishes, the user specifies what is to be done at the time of his/her death, in terms of care of the body, funeral specifications, property/estate directives, planned giving, insurance policies, life support instructions, organ donation, and other vital details. When the time comes, Last Wishes acts as an up-to-date, detailed guidebook for the survivors to facilitate the completion of the decedent's affairs.
