Michael Freeman : Law and Neuroscience: Current Legal Issues Volume 13 before purchasing it in order to gage whether or not it would be worth my time, and all praised Law and Neuroscience: Current Legal Issues Volume 13:

Current Legal Issues, like its sister volume Current Legal Problems, is based upon an annual colloquium held at University College London. Each year leading scholars from around the world gather to discuss the relationship

between law and another discipline of thought. Each colloquium examines how the external discipline is conceived in legal thought and argument, how the law is pictured in that discipline, and analyses points of controversy in the use, and abuse, of extra-legal arguments within legal theory and practice. *Law and Neuroscience*, the latest volume in the Current Legal Issues series, offers an insight into the state of law and neuroscience scholarship today. Focusing on the inter-connections between the two disciplines, it addresses the key issues informing current debates.

About the Author Michael Freeman is Professor of English Law at University College London and is the series editor for Current Legal Issues.
