**Karen Judson BS, Carlene Harrison Ed.D CMA : Law Ethics for the Health Professions** before purchasing it in order to gage whether or not it would be worth my time, and all praised Law Ethics for the Health Professions:

12 of 12 people found the following review helpful. Not a very happy consumer right nowBy Angela F ScholzeI bought the text book assuming that the online access code would be included with it. Now, in order to comply with my class requirements, I have to pay an ADDITIONAL \$55 IN ORDER TO HAVE ONLINE ACCESS. It would be very informative if this could be included in the description as to whether or not it included the ONLINE ACCESS CODE.. Not a very happy consumer right now.0 of 0 people found the following review helpful. Law and EthicsBy DimplesI used this book for school and it was very interesting. A lot I didn't know about or heard about before opened my mind a little more knowledge wise.0 of 0 people found the following review helpful. Five StarsBy carlita arilaGreat Book!

Law and Ethics for the Health Care Professions illustrates the numerous legal and ethical issues that health care

professionals face every day. The topics are derived from real-life experiences and dilemmas from a variety of health care practitioners. Through the use of Learning Outcomes, Key Terms, Ethics Issues, Chapter Reviews, Case Studies, Internet Activities, Court Cases, and Video Vignettes, students hear from health care practitioners in various locations throughout the United States as they encounter legal and ethical problems and situations. Students will practice critical thinking skills to decide how to resolve the real-life situations or theoretical scenarios, determine why the court made a particular ruling and decide how the issues are relevant to the health care profession they will practice.

About the Author  
Carlene Harrison, EdD, CMA (AAMA)  
Carlene Harrison is Dean of the School of Allied Health at Hodges University and is also Program Director for the Master of Health Services Administration and Graduate Certificate in Health Informatics. She has been a member of the faculty at Hodges University since 1992, but came on board full time in 2000, serving first as Chair of the Medical Assisting Program. As Dean of the School of Allied Health, she has overall responsibility for the following degree programs: Health Services Administration, Biomedical Sciences, Medical Assisting, Health Information Management, and Physical Therapist Assistant. Her doctorate is from Argosy University. Her dissertation research looked at improvement in critical thinking in adult learners. Before becoming a full-time educator, Dr. Harrison worked for over 20 years in the healthcare field as an administrator. Employed mostly in the outpatient setting, she has worked in the for-profit, not-for-profit, and public health sectors.  
Karen Judson, BSK  
Karen Judson taught biology laboratories at Black Hills University in Spearfish, South Dakota; high school sciences in Idaho; and grades one and three in Washington state. She is also a former laboratory and X-ray technician and completed two years of nurses training while completing a degree in biology. Judson has worked as a science writer since 1983. She has written relationship, family, and psychology articles for a variety of magazines, including a series of high school classroom magazines, making a total of 500 articles published. Judson writes science and relationship books for teenagers (Enslow and Marshall Cavendish publishers). Her book for teens, *Sports Money: Its a Sell Out*, made the New York City Public Library's list of best books for teens in 1995. Her book for teens, *Genetic Engineering*, was chosen by the National Science Teachers Association as one of the best science books for children in 2001 and was featured on the NSTA Web site.
