Steven L. Emanuel, Lazar Emanuel : Law in a Flash Cards: Professional Responsibility (2-part set) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Law in a Flash Cards: Professional Responsibility (2-part set):

0 of 0 people found the following review helpful. these cards were great and the questions really help reinforce the information you ...By CustomerI'll give this product 3.5 stars. In general, these cards were great and the questions really help reinforce the information you learn. However, I discounted some stars because I might have received a bad batch. My batch had some (1) missing cards (2) duplicates and (3) were out of order. So when I was reviewing the cards that have 2-parts the first time around, I would become confused because it would discuss one scenario than all of sudden talk about something completely different. When I would look at the card number, the second part of the card would be placed somewhere else in the pile. But overall, if you got a good batch of cards, then you should be pretty happy.0 of 0 people found the following review helpful. Not Bad If Misprints Do Not Bother YouBy B. YooNumerous misprints. Many hypotheticals and answers take up several cards and have different font sizes which defeat the purpose of studying by flashcard. (Might as well just type that essay out on regular size paper.) Some of the hypos focus on names and useless info rather than the issue at hand. I don't know if the MPRE's questions are like these, but they really make it difficult to identify the core issue when you have juggle five different names and how they relate to each other.Otherwise, content is thorough.3 of 3 people found the following review helpful. Good, not greatBy Truth BearerThese cards were the only thing I used to study for the MPRE. There are two boxes of cards and it takes about 8 hours to go thru each box carefully, so plan on 2 full days to go thru them all. I went thru each box twice, and it took me about 5 days of studying 6 hours per day to do so. I received a 131/150 scaled score (only need 80-85 to pass most jurisdictions), so these cards work. On the other hand, (i) the naming conventions used in the card are confusing (e.g., the author likes to use famous names in the examples, but that just kept me focusing on the names rather than the subject), (ii) the depth of the subjects treated is too great in some cases and not enough in others, and (iii) the card format means it's difficult to organize the material and put it in a logical framework without doing your own outlining. Thus, it's strickly a memory exercise. If you have a decent memory, these cards are very good for their intended purpose. If you don't, I suggest you use another format to study. If you really want to learn the Model Rules so you can apply them in real life (as opposed to just pass the MPRE), you may want to get a more conventional textbook.

Study anytime, anywhere! Law in a Flash comprehensive flash cards are ideal for reviewing legal topics point by point. Each card has a concise question on one side and an accurate answer on the reverse side. These cards are the only product of their kind. Law in a Flash Card Features:Only product of its kind Test your knowledge of black letter law Apply the law to hypothetical examples Use individually or in group sessions Use them anywhere, anytime Great for exam prep
