**Eli Lederman, Ron Shapira : Law, Information and Information Technology (Law and Electronic Commerce)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Law, Information and Information Technology (Law and Electronic Commerce):

The evolving information society is creating new economic, cultural and political opportunities. However, it also brings with it new issues and risks, which pose fresh challenges to every legal system. This collection contains articles, authored by leading scholars in pertinent legal fields from all around the world, analyzing and attempting to meet these challenges. The articles contained in this collection present multifaceted intersections of law, information and information technology in the following fields: The Emerging Legal Field of Information Law Privacy Law Intellectual Property Law Internet Law and Regulation Stock Market Law Authentication of Electronic Messages and its Legal Implications
