Lawrence Gostin, Judith Areen, Patricia King, Steven Goldberg, Peter Jacobson : Law, Science and Medicine, Third Edition (University Casebook Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Law, Science and Medicine, Third Edition (University Casebook Series):

0 of 0 people found the following review helpful. This is an amazingly useful text, edited by one of the worlds leaders ...By glenn ekblad This is an amazingly useful text, edited by one of the worlds leaders in Law, Science and Medicine. Truly a most important reference book for everyone in public health, law, and medicine to have in their reference library. Dr Glenn Ekblad, DO, MSN, MPH Graduate Student at George Washington University, FACEP, FAAEM. Director of Preventive Medicine, School of Medicine, Western Michigan University, Kalamazoo, Michigan.

The overarching issue in this casebook is how ought society learn about and respond to science and medicine. Five themes are explored: The use and misuse of scientific or medical expertise in making public policy; Who decides; the need to find appropriate institutions to promote, to direct, and even to curtail science and medicine; The application of risk assessment or cost-benefit analysis to scientific and medical issues; The contrasting value systems of law, science, and medicine; and The ethical and religious implications of developments in science and medicine.
