Content great, Condition meh By tlgf1968 the information provided within this text is outstanding and also presented well; although, i did find that some of the websites noted were no longer active. in addition, when i tried emailing the author [as instructed if/when finding discrepancies] the email was returned as not active. as far as the overall purchase, the seller packaged the textbook very well. i was a little disappointed with the amount of highlighting and writing in the book. but, i did not feel strongly enough about it to contact the seller. 0 of 0 people found the following review helpful.
