Edited by a seasoned Legal Nurse Consultant (LNC), this reference is for nurses who provide consultative services, both in-house and independently, to attorneys, insurance companies, risk management departments, government agencies, and others. It examines the roles of LNCs in a variety of practice environments and legal areas. Designed to meet the needs of both novices and advanced practitioners, *Legal Nurse Consulting: Principles and Practice* focuses on the skills, processes, and information requisite to quality LNC practice. Written and reviewed by experienced, practicing LNCs, chapters include topics such as: the LNC's role in professional negligence, product liability, toxic tort, and criminal litigation; life care planning and damages assessment; the nurse as expert witness; working with experts; preparing and evaluating deposition and trial testimony; principles of legal writing; legal theory; medical record and case analysis; medical literature research; client interviews and communications; independent medical examinations; discovery/disclosure; alternative dispute resolution and medication; trial preparation and trial; the LNC's role in the insurance industry and in risk management; business principles for the LNC; ethics, professionalism, and standards of practice for LNCs.
