J. Paul Lomio, Henrik Spang-Hanssen : Legal Research Methods in the U.S. Europe: Second Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Legal Research Methods in the U.S. Europe: Second Edition:

0 of 0 people found the following review helpful. Excellent Treatise or Textbook By Lee F. Peoples The book is written by J. Paul Lomio, Director of the Law Library and Professor of Law at Stanford Law School and Henrik Spang-Hanssen, a Danish Supreme Court Attorney. This book covers the subject of legal research methods in the U.S. and Europe in a depth and detail not found in other works. It could be used as a treatise on the subject or a textbook for a

foreign and international legal research class. One specific strength of the book is its coverage of researching European Union legal research. It covers this subject in a level of detail not found in other works on the subject. Most guides to EU legal research merely skim the surface, mentioning just the very basic skills and techniques for research into EU law. This work digs deeply into EU legal research. It explains the functioning of EU institutions and the records and documents they produce. It is thoroughly footnoted with references to lead the reader back to primary source documents. An added feature is a teachers manual posted by one of the authors to SSRN.com. I highly recommend this title to any professor or student of foreign and international legal research and for any law library collection. 0 of 0 people found the following review helpful. Comprehensive Yet Convenient Survey of U.S. European Legal Research Methods Successfully Bridges Cultures By George D. Wilson This handy, soft-cover survey of U.S. and European research methods offers a comprehensive but still convenient source for understanding the two, distinct legal cultures. It contains numerous, valuable points on the similarities and differences between common and civil law.

This book is a legal research guide that addresses the internationalization and globalization of both the new curriculum for law schools - especially in the U.S. - and the practice of law. The book covers the subject of legal research methods in the U.S. and Europe in a depth and detail not found in other works. It can be used as a treatise on the subject or a textbook for a foreign and international legal research class. This second edition includes more research tips and a revised Chapter 4 with a special section on the EU's Treaty of Lisbon. This edition also includes a teachers' manual as a companion to Chapters 3-7.

- Lawyers today need to be educated more broadly if they are to serve their clients and society well. Stanford Law School Dean Larry Kramer - This is an invaluable tool and manual for students and scholars around the world. Assistant Dean for International Programs, Washington University School of Law, Michael Peil. - This book is of inestimable value and should be in arm's length of any lawyer working in the field of international relations. Professor of Law at Santa Clara University School of Law, Jiri Toman - This book will enable law students and lawyers from opposite sides of the Atlantic Ocean to speak each other's legal research language, a good first step for successful international collaboration and understanding. 2003-2004 UN High Commissioner for Human Rights, dr. juris Bertrand Ramcharan About the Author J. Paul Lomio is Library Director and Lecturer in Law at Stanford Law School. He holds both a U.S. Juris Doctor degree and an LL.M. degree in Law and Marine Affairs as well as a Masters of Library and Information Science. He was a member of the Gonzaga Law and has published several law review articles. This is his first book. See www.law.stanford.edu/library Henrik Spang-Hanssen is a Danish Supreme Court Attorney-at-law and senior researcher, including five years in the United States. He holds masters degrees in law from Copenhagen University in Denmark and Santa Clara University in California and is regarded by many as an expert on the intersection of public international law and public international computer networks.
