## Conflict Peacebuilding and Natural Resource Management) (Volume 5):

Sustaining and strengthening local livelihoods is one of the most fundamental challenges faced by post-conflict countries. By degrading the natural resources that are essential to livelihoods and by significantly hindering access to those resources, conflict can wreak havoc on the ability of war-torn populations to survive and recover. This book explores how natural resource management initiatives in more than twenty countries and territories have supported livelihoods and facilitated post-conflict peacebuilding. Case studies and analyses identify lessons and opportunities for the more effective design of interventions to support the livelihoods that depend on natural resources from land to agriculture, forestry, fisheries, and protected areas. The book also explores larger questions about how to structure livelihoods assistance as part of a coherent, integrated approach to post-conflict redevelopment. *Livelihoods and Natural Resources in Post-Conflict Peacebuilding* is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions from practitioners, policy makers, and researchers. Other books in this series address high value resources, land, water, assessing and restoring natural resources, and governance.

"This book is an excellent compendium of such conflicts, their contexts, and innovative ways for peace-building in policy and practice." - Paula Hanasz, Asia and the Pacific Policy Society About the Author Helen Young is a professor at the Friedman School of Nutrition Science and Policy at Tufts University and a research director at the schools Feinstein International Center. Lisa Goldman is a senior attorney at the Environmental Law Institute.
