**Geoffrey Tweedale : Magic Mineral to Killer Dust: Turner Newall and the Asbestos Hazard** before purchasing it in order to gage whether or not it would be worth my time, and all praised Magic Mineral to Killer Dust: Turner Newall and the Asbestos Hazard:

1 of 6 people found the following review helpful. Magic Mineral to Killer Dust By spamchowcochon Well written and researched. I found the book to be quick read and very informative.

Asbestos was once known as the 'magic mineral' because of its ability to withstand flames. Yet since the 1970s, it has become a notorious and feared 'killer dust' that is responsible for thousands of deaths and an epidemic that will continue for many years.

'The book is a devastating indictment of the cynical lies and evasion, backed by ranks of paid for medics and scientists, that saw generations of T and N workers wiped out.' Jawad Qasrawi, *Hazards*, 74, 2001  
'The story told by Tweedale is usually interesting, often moving and sometimes shocking. There can be little doubt that the author pursues his subject with integrity and has undertaken meticulous research in a difficult area of scholarship.' Joseph Melling, *Business History*  
'Tweedale ... his study provides a formidable contribution to the continuing debate on business ethics as well as to the history of the human costs of business success in hazardous industries.' Joseph Melling, *Business History*  
'Geoffrey Tweedale's book ... compelling and often chilling.' Morris Greenberg, *THES* 12.01.01.  
'absorbing, horrifying and sobering ... Geoffrey Tweedale ... has arranged the mountain of material with great skill to produce a well-documented and very readable account.' Trevor Ogden, *The Annals of Occupational Hygiene*, Vol.44/8.  
'This is a fascinating and thought-provoking book and a damning indictment of government and big business approaches to occupational health. Given the role that asbestos has played in the maritime industries, it should be essential reading.' Sandra Spears, *Lloyds List*, March 11, 2000.  
About the Author Geoffrey Tweedale is a Senior Research Fellow in the Centre for Business History, Manchester Metropolitan University. From 1983 he worked as a Researcher and Teacher in the History of Business, Technology, and Medicine, and more recently has held the position of Research Fellow at both Manchester and Sheffield universities.
